

## **Press Release**

23rd April 2013

### **Top marks for GlucoDock® from MEDISANA®**

#### **GlucoDock® won over the jury in the PCgo Test**

*Neuss.* GlucoDock®, the blood glucose module from Medisana® for iPhone®, iPod touch® or iPad®, has convinced the jury in the current issue of the technology magazine PCgo. It was awarded the top rating of "Very Good" in the individual testing from a jury of experts. The fact that the module is easy to use was seen as a particular plus. GlucoDock® also scored well as all measurement data are entered into the diary automatically, but can also be recorded by hand without the use of the module.

The technology magazine PCgo is a monthly IT and computer magazine from the WEKA Publishing Group. In each issue, consumer-friendly tests are carried out on computers, hardware and software products, then graded and recommendations for purchase given. PCgo has given its readers tips, tricks, and purchase advice for 20 years now

following the motto "We make technology easy!".

GlucoDock®, with its diary function making the tedious recording of measurements and insulin units a thing of the past for diabetics, is one of the four health measurement modules available in the innovative VitaDock® series. The product series is supplemented by ThermoDock® (infrared thermometer module), CardioDock® (blood pressure measurement module) and TargetScale® (body analysis scale). Thanks to the VitaDock® App that is available for free in the Apple App Store, the measured vital signs can be saved, analysed and accessed anywhere using an iPhone®, iPod touch® or iPad®. In addition, MEDISANA® offers a free online portal to save and evaluate data as statistics and tables with its cloud service, VitaDock® Online.
